

The new NCLOR 5.0 is coming soon!

Below is a sneak peek of the new look and features that will be available in the new version of the North Carolina Learning Object Repository.

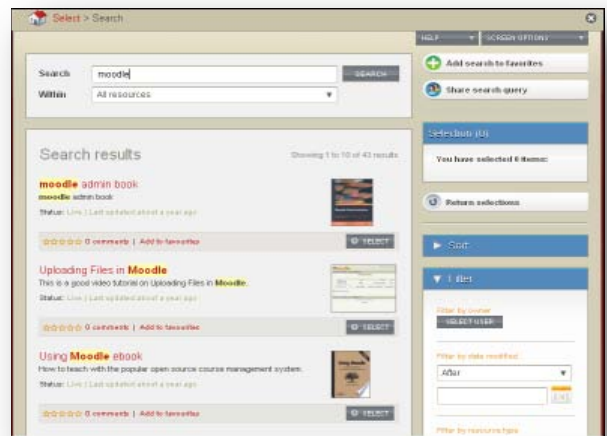

Dashboard

The old home page has been replaced by a **Dashboard** page that displays portlets. This new modern design is customizable by users.

Search Capabilities

A new search page has been added where you are able to quickly filter results by attachment, as well as save and share results through email, RSS and Atom feeds.

LMS Enhancements

Functionality and interface enhancement have also been improved between the NCLOR and the learning management systems (including support for Moodle 2.x).
